Children enthusiastically interacted with the university PR teams, gathering basic information on the latest career trends. They were especially drawn to the 'Liberal Arts Multi Disciplinary Approach' offered by some universities, which allows children the freedom to themselves design and pursue an under graduate programme, giving them a chance to explore and develop their skills, to later achieve success in a field they are passionate about.

EVERGREEN WORDS OF WISDOM

सुखार्थिनः कुतो विद्या नास्ति विद्यार्थिनः सुखम्।
सुखार्थी वा त्यजेद्विद्यां विद्यार्थी वा त्यजेत् सुखम्।।

हिन्दी अर्थ: आराम के साधकों को ज्ञान प्राप्त नहीं होता, और ज्ञान के साधकों को आराम प्राप्त नहीं होता। सुखार्थी को विद्या और विद्यार्थी को सुख त्याग देना चाहिए।

English Translation:
There is no knowledge for the seekers of comfort, and no comfort for the seekers of knowledge.
A seeker of comfort should give up knowledge, and a seeker of knowledge should give up comfort.

युक्ति युक्तं प्रगृह्णीयात् बालादपि विचक्षणः।
रवेरविषयं वस्तु किं न दीपः प्रकाशयेत् ।।

हिन्दी अर्थ: बुद्धिमान को बच्चों से भी युक्तिपूर्ण वचन ग्रहण करने चाहिए। क्या दीप उस वस्तु को प्रकाशित नहीं करता, जिसे सूर्य प्रकाशित नहीं कर सकता?

English Translation:
The wise should learn to accept wisdom from anybody, even from a child.
Doesn't the small night lamp light up things which the sun can not?

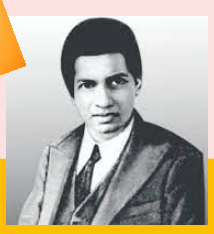
MATHOPEDIA



INDIAN MATHEMATICAL GENIUS SRINIVASA RAMANUJAN

Srinivasa Ramanujan was an Indian mathematician who lived during the British Era. Though he had almost no formal training in pure mathematics, he made substantial contributions to mathematical analysis, number theory, infinite series, and continued fractions, including solutions to mathematical problems which were considered unsolvable all over the world, at that time.
He was born on 22 December 1887, so we shall be celebrating his 134 birth anniversary this year.

HARDY RAMANUJAN NUMBER

The number 1729 is known as the Hardy Ramanujan number.
The reason for this is Ramanujan's explanation about the way in which this number is special. When his English Mathematician friend GH Hardy remarked that 1729 was 'a rather dull number', Ramanujan said "it was a very interesting number as it was the smallest number expressible as the sum of two cubes in two different ways."
The two different ways are:
$1729 = 13+123$ and $1729 = 93+103$

It was commonly said by Ramanujan's contemporary mathematicians that, every positive integer was one of Ramanujan's personal friends.

VEDIC MATHS TRICK FOR SQUARING NUMBERS

Squaring of 9

Step 1: The nearest power of 10 to 9 is 10. Therefore, let us take 10 as our base.
Step 2: Since 9 is one less than 10, decrease it by the deficiency (9-1=8). This is the leftmost digit of our answer.
Step 3: On the right hand side, put the square of the deficiency, which is 1. Hence the square of 9 is 81.

NOW TRY THIS TRICK TO FIND SQUARES OF SOME OTHER NUMBERS AND CHECK TO SEE IF IT ACTUALLY WORKS.

DECEMBER 2022
